NEW 2014

Small and bright.

Made in Germany

b.m
BUSCH + MÜLLER

IQ-TEC Premium is hardly noticeable at first glance. That is because we integrated the new premium technology almost invisibly into our most successful headlight models. When it gets dark, however, the Extensive Light Field is a stunning light experience.

Cyo® IQ Premium

Dynamo powered headlight. With light at close range. Sensor automatic. Standlight. Approved by German road traffic regulations. Daytime running light LICHT24 optional. With integrated reflector: 60 Lux. Without reflector: 80 Lux (fig.).

Made in Germany

Fly IQ Premium

Dynamo powered headlight. With light at close range. Sensor automatic. Standlight. Approved by German road traffic regulations. With daytime running light LICHT24: 60 Lux. Without daytime running light: 80 Lux.

Made in Germany

IXON IQ® Premium

Battery powered headlight. With light at close range. 80 Lux. With capacity indicator. Approved by German road traffic regulations for all bikes.

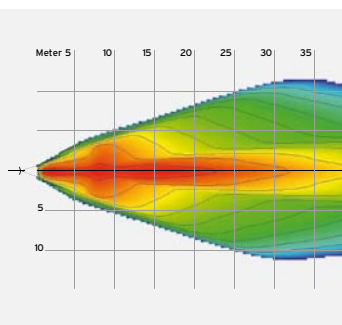

Made in Germany

IQ-TEC Premium

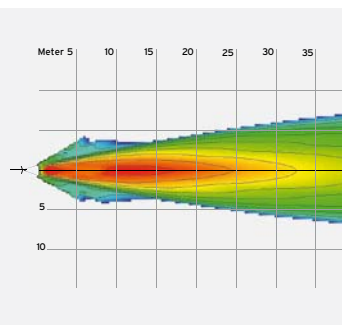

World debut: The Extensive Light Field

IQ-TEC was the revolution for bicycle headlights. Here comes IQ-TEC Premium. The Lux value is raised by 20 or 40 Lux, depending on headlight type. The result is always a quantum leap into a new dimension. The "carpet of light" is twice as wide, incredibly homogenous and has brilliant light at close range. Cycling in the dark - no matter how fast - is pure pleasure with the new Extensive Light Field.

IQ-TEC Premium with Extensive Light Field

All virtues of IQ-TEC have been drastically improved: The increased light output is distributed perfectly. The eye perceives the supremely homogenous field of light in its entirety, without any light irritations. And most importantly: The light field is twice as wide! This wide view provides the cyclist with an outstanding safety plus - especially while turning.

IQ-TEC to date

The area in front of the bicycle is very well lit, from close range into the distance. However, the width of the light field is more restricted and concentrated onto the core region of the road.

LUMOTEC SERIES. Dynamo headlight.

Eyc®

- 50 Lux
- LICHT24. Daytime running light
- Light at close range
- Standlight
- Sensor automatic

Small, yet very capable.

IQ2 technology. Very good and homogenous lighting of the road. Clip on reflector. Only 70 g light. Decrease in volume of over 60 % when compared to the previously smallest Lumotec (Cy). Type 160.

Made in Germany

IX-POST®

LED battery powered rear light. For 2 (rechargeable) AAA batteries. Shines approx. 30 hours (with non-rechargeable batteries). Enclosed in rubber casing. With indication LED. 65 mm tall, 43 mm wide. Weight (incl. battery and mount): 68 g. Approved by German road traffic regulations. Type 384.

Simple and convenient.

IXON Core and IXXI: Mounting with snug rubber straps. Charged via micro USB port via standard USB charger or computer.

IXON SERIES. Battery headlight.

IXON® Core

Small, yet very mobile.

In Germany approved for all bikes. IQ2 technology. Very good and homogenous lighting of the road. Removable with one click. Fits all handlebars. Circumferential soft component offers shock protection.

- 50 Lux - high power mode: more than 3 hours
- 12 Lux - low power mode: 15 hours
- Aluminium casing, silver anodised
- Integrated, rechargeable lithium-ion battery
- Charged via micro USB port 
- With capacity indicator
- Splash- and rainwater proof
- Approved by German road traffic regulations

Made in Germany

IXXI®

ONLY 35 GRAM

Battery powered rear light. High output LED. Very bright, large beam angle. Fits all seat posts. 53 mm tall, 31 mm wide. Weight (incl. battery and mount): 35 g. Type 383.

- Integrated, rechargeable lithium-ion battery
- Shines for 15 hours
- Charged via micro USB port 
- With capacity indicator
- Approved by German road traffic regulations

Light unit can be removed from the robust rubber casing with just one hand movement, allowing access to the bottom charging port.

Made in Germany

TOPLIGHT SERIES. Dynamo rear light.

VIEW plus

The most elegant TOPLIGHT of all times. The clear casing allows for optimal lateral light emission. Automatic standlight. Centrally integrated large reflector. 18 mm slim. Only 50 g. Type 321.

LineTec x 2

Two super bright LEDs create a dual light source. Two patented light systems emit two strips of light. The effect: a brightly shining light area that can be perceived from great distances.

Made in Germany

Version VIEW brake plus. With brake light function.

Super bright, pulsating light strips at the top and bottom.

The BrakeTec version of the TOPLIGHT view. If the velocity decreases significantly, both the upper and lower light strip pulsate extremely brightly.
